

SLOVENIA residents final comments to Nicotine Users Survey 2020

Do you have any additional remarks?

6 comments from Slovenia residents:

- No

- no

- Vaping saved my Lungs, my immune system boosted and since then my Lung capacity went from 4.5 l to 6 l. I smell all, I returned the taste to my mouth and I started back free diving and I get more air and can drive bike uphill with no problem. Have had while smoking almost every winter Pneumonia, now I do not even catch a Cold.

- I've been a smoker for 25+ years and I tried everything to stop smoking (patches, hypnosis, meetings) and nothing worked for me until I started vaping. Since my first vape I never had a desire to go back on cigarettes and my overall health had improved tremendously - and that is exclusively because of vaping. I wish you would do more to help smokers quit - including by making vaping more acceptable; if you care about people's health. If I was introduced to vaping 10 years ago I'd have additional 10 more years of life in front of me.

- Leave vaping alone. Continue testing. Encourage more people to use it as a healthier alternative to smoking. Remove the TPD section on tank capacity sizes so I don't keep having to source separate bubble glasses for my tanks.

- Vape is not a tobacco product... The regulation will must be for vaping aromas of additives inside...
